*** ANNOUNCEMENT ***

--File 581 - The 2003 annual reload of Population Demographics is complete. Please see Help News581 for details.

--File 990 - NewsRoom now contains February 2003 to current records.
File 992 - NewsRoom 2003 archive has been newly created and contains records from January 2003. The oldest months's records roll out of File 990 and into File 992 on the first weekend of each month.
To search all 2003 records BEGIN 990, 992, or B NEWS2003, a new OneSearch category.

--Connect Time joins DialUnits as pricing options on Dialog.
See HELP CONNECT for information.

--CLAIMS/US Patents (Files 340,341, 942) have been enhanced with both application and grant publication level in a single record. See HELP NEWS 340 for information.

--SourceOne patents are now delivered to your email inbox as PDF replacing TIFF delivery. See HELP SOURCE1 for more information.

--Important news for public and academic libraries. See HELP LIBRARY for more information.

--Important Notice to Freelance Authors--
See HELP FREELANCE for more information

Statement of position 98-1--accounting for the costs of computer software developed or obtained for internal use
 Anonymous
 Journal of Accountancy v185n4 PP: 91-98 Apr 1998 ISSN: 0021-8448
 JRNL CODE: JAC
 WORD COUNT: 8945

ABSTRACT: Statement of Position 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use, identifies the characteristics of internal-use software and provides examples to assist in determining when computer software for internal use. The SOP applies to all nongovernmental entities and is effective for financial statements for fiscal years beginning after December 15, 1998.

TEXT:

Consumers and businesses are steadily adopting broadband sources such as fiber optics, satellite and cable modems that provide very high speed access to information and media of all types via the Internet, creating an "always-on" environment. The result will be the Convergence Age, a widespread integration of entertainment, telephony and computerized information: data, voice and video, delivered to a rapidly-evolving array of Internet appliances, PDAs, wireless devices (including cellular telephones) and desktop computers.

ISSN: 1047-9325 LANGUAGE: ENGLISH RECORD TYPE: FULLTEXT; ABSTRACT
WORD COUNT: 6861 LINE COUNT: 00568

ABSTRACT: There was much discussion of digital publishing/printing/graphics streams at the Mar 1995 Seybold Seminars Boston gathering. One session on color management systems focused on Apple's ColorSync 2.0. The open-architecture system provides a means for transferring information among devices and applications. Digital technologies that will be exhibited at May's Drupa exposition are also discussed.

ABSTRACT: During the past 30 years, the structure of the global semiconductor industry has undergone a process of progressive vertical specialization, which has resulted in the entry of specialized firms into semiconductor design, manufacture, equipment production, and most recently, process development. Entry of specialized firms has had the most significant consequences for the relationship between semiconductor device design and device manufacture. This form of vertical specialization also has contributed to the rapid growth of semiconductor manufacturing capacity in Southeast Asia and the creation of new forms of international production networks linking design and manufacturing specialists. Vertical specialization in the development of new process technologies by equipment manufacturers has begun much more recently and remains a prospect rather than a reality. Vertical specialization in the semiconductor industry predates widespread use of Internet-enabled e-Business strategies and methods. With some exceptions, such as the ability of the Internet to support design simulation in "design block" exchanges, e-Business appears to be facilitating and accelerating these long-standing trends and their effects on the geographic distribution of manufacturing capacity rather than creating qualitatively new possibilities.

Meet the new VSAT: Moving from VSAT to SIT to broadband

Franczyk, Frank

Satellite Communications v24n7 PP: 22-24 Jul 2000 ISSN: 0147-7439

JRNL CODE: SAC

WORD COUNT: 1474

ABSTRACT: Many new satellite-based **communication** networks and legacy satellite very small aperture terminal (VSAT) networks are moving towards a standards-based environment. This move will fuel equipment provider innovation, increase features and facilitate the integration of a plug-and-play satellite-based interface with local area networks (LAN) and wide area networks (WAN). With the emergence of the Internet and the Web, and the subsequent demand for network access, TCP/IP-based networks have spread like wildfire. VSAT technologies have also been evolving as part of a larger sophisticated network of networks. Next generation broadband VSATs, or Satellite Interactive Terminals (SIT), are based on open standards that are widely accepted and deployed.

Meet the iBook

ABSTRACT: Apple's iBook is a candy-coated, flattened iMac whose rugged design and bright colors are sure to win the hearts of first-time laptop owners and Web-addicted couch potatoes everywhere. The iBook's creative design, wild colors, special features, and even its \$1,599 price tag break the mold of portable computing and are likely to send colorful shock waves throughout the computer industry. Of all the iMac features, the one that laptop fans covet the most is its astonishingly smooth, unusual design: it wakes up from sleep when you open the lid. Even though the look-and-feel of the iBook is captivating, the iBook is not for everyone. Professional users may miss the elements found on the PowerMac G3 laptops: PC Card slots, a microphone, an infrared jack, a monitor-out jack and a floppy drive.

A survey of selected federal regulatory and legal developments in electronic financial services

Vartanian, Thomas P; Ledig, Robert H; Conover, Alison C

Business Lawyer v53n1 PP: 251-305 Nov 1997 ISSN: 0007-6899 JRNL CODE: BLW

WORD COUNT: 22168

ABSTRACT: A paper presents an overview of recent regulatory and legal developments impacting electronic financial services (EFS) and analyzes the actions taken to date by each of the federal banking regulators. The paper describes how the federal banking regulators each have responded in restrained yet proactive ways to facilitate the development of EFS. It is predicted that the evolution of EFS will require regulators to adapt existing standards to accommodate that evolution, and it is suggested that depository institutions must participate aggressively in the development and distribution of EFS in order to maintain their customer base. Because the evolution of EFS will cause an erosion of traditional notions of legal jurisdiction, issues of state and federal preemption should be addressed.

Internet World 95: eyewitness report

Raeder, Aggi

Information Today v12n5 PP: 57-59 May 1995 ISSN: 8755-6286 JRNL CODE: IFT

WORD COUNT: 2765

ABSTRACT: Mecklermedia's Internet World 95, the Internet World Wide Web Conference and Exposition, held April 10-13, 1995, in San Jose, California, is discussed. Sponsors of the conference in addition to Mecklermedia's Internet World magazine included the Commercial Internet Exchange and the Mercury Center. The 192 exhibitors at the event varied from big companies like Digital Equipment Corp., Apple, IBM, and Silicon Graphics to CompuServe, PSI, NetCom, and Delphi to numerous enterprises or consultants offering some sort of Internet tool. The 1995 Internet World award went to Netscape Navigator 1.1 by Netscape **Communications** Corp. as outstanding **software**. The 2 outstanding hardware products were both modems - IBM's SOHO Assistant, a data/fax/voicemail modem, and Rockwell **Communication**'s Nethopper, a router plus 14,400 baud modem. At the conference, CompuServe, having just bought Spry, announced Internet access for its customers. Microsoft demonstrated Windows 95, which enables 32-bit programs, allowing multitasking and multithreading. Other developments from the Internet World 95 conference are detailed.

The Internet and interactive television

Press, Larry

Communications of the ACM v36n12 PP: 19-23+ Dec 1993 ISSN: 0001-0782

JRNL CODE: ACM

WORD COUNT: 4126

ABSTRACT: The idea of a National Information Infrastructure is in the air. Two amorphous groups - the Internet community and the interactive television community - are working on information infrastructure. While there is similarity in what they envision, there are also significant differences in their world views. It seems the Internet is growing rapidly, becoming increasingly commercial and increasingly global, and new ways of accessing the Internet are developing. During 1993, dozens of interactive TV alliances have been formed between entertainment, cable, telephone, and computer companies. However, the Internet and interactive TV communities have different cultures. Some differences between the communities include: 1. applications, 2. data types, 3. terminal device, 4. geographic scope, 5. media, 6. access ethic, 7. economic orientation, 8. information valuation, and 9. rollout schedule.

ABSTRACT:

TVN Entertainment Corp, a provider of Web, satellite and cable programming and services, has opened a new Broadband Internet Center in Burbank, CA. The center is for its new Broadband Internet Services Group. The new facility offers a variety of services including digital compression, storage, content management, playback and origination of content, remote video-on-demand server monitoring and operations, and secure satellite caching to Internet edge points of presence and cable headends. The facility will enable companies to migrate between narrowband and broadband platforms. The Broadband Internet Services Group will target its services to cable operators, content providers and Internet service providers.

The future of television

(Consumers will demand multichannel TV delivery systems, and will no longer be content with limited offerings, according to Terry Snazel of ExpressVu Inc, a Canadian DTH satellite service)

Broadcaster, v 57, n 2, p 10+

March 1998

DOCUMENT TYPE: Journal ISSN: 0008-3038 (Canada)

LANGUAGE: English RECORD TYPE: Fulltext

WORD COUNT: 2345

ABSTRACT:

Consumers will demand multichannel TV delivery systems, and will no longer be content with limited offerings, according to Terry Snazel of ExpressVu Inc, a Canadian DTH satellite service, speaking at "the Future of Television" forum at the Society of Motion Picture and Television Engineers 32nd Advanced Motion Imaging Conference (Toronto). Satellite broadcasts will likely become more popular than cable, which will have to convert to digital broadcasting.

Roger Key of Rogers Cable Systems says that this conversion of cable to digital is already well underway. Tele- **Communications** Inc (US) has already committed to having 90% of its network equipped for digital

broadcasts by end-1993.

Tom McMahon of Microsoft Inc says that cable will have the decided advantage of being able to deliver interactive services to homes.

Ian Tapp of NDS America Inc says that in the long run, the forces shaping television will be technology, market demand and government regulation. The declining cost of computer memory will make it easier for consumers to download programs from broadcasters and then watch the programs whenever they want to. 3D TV might also be developed.

Full text article continues with other comments on the forces shaping the future of television.

**Thinking Outside the Boxes -- An old-line manufacturing company prospers
with an online wireless network that carries important data to key
production workers. (Corrugated Supplies) (Company Operations)**

Joch, Alan

Network Magazine, 96

June 1, 2001

ISSN: 1093-8001 LANGUAGE: English RECORD TYPE: Fulltext; Abstract

WORD COUNT: 3011 LINE COUNT: 00242

ABSTRACT: Corrugated Supplies needed a way to streamline their systems to make it easier for their employees to deal with orders and for customers to place their orders. The 11 person IT department developed proprietary resource **management software** so that customers can enter their orders over the Internet. Corrugated is building an even bigger warehouse so they also needed a way for their forklift drivers and others to receive information. They enlisted the help of Cisco Systems for a wireless network and will be using their network switches and bridge routers.

ABSTRACT: The TCP/IP **Software** Directory provides a comprehensive listing of **software** products available for TCP/IP network applications. The directory is an alphabetical company listing of **software** products that apply to the TCP/IP industry with a description of each package. Each product is identified by one of ten colour coded categories of **software**. The directory also provides an alphabetical company index divided by **software** category.

ABSTRACT: Microsoft offers several system-enhancement utilities in its Microsoft Plus! add-on package for Windows 95, but third-party vendors have an even broader array of utility offerings. Plus! requires 8MB of RAM and 25MB of disk space and includes an improved disk-compression tool, Internet-access tools, a scheduler, font anti-aliasing, a 3D pinball game and professionally designed interface elements and wallpaper. Symantec's \$119 Norton Utilities for Windows 95 includes easy-to-use disk-recovery tools, a new Protection tool that preserves all deleted files when Windows is running and a System Information utility that provides deep software information but little hardware data. The \$99 Norton Navigator for Windows is a desktop enhancement with an improved Taskbar and FTP utility; longtime users of Norton Desktop will be disappointed with the lack of file viewers. Several other utilities, including Nico Mak Computing's excellent WinZip 6.0, Canyon Software's Drag and File and Drag and Zip mouse enhancers, and Wilson WindowWare's WinBatch 95 batch-programming utility, are also reviewed.

ABSTRACT: A buyers guide offers information on development tools and utility applications. The tools are employed in every aspect of application development, from prototyping to querying and reporting. The guide is organized alphabetically according to category. The categories include 3GL tools, analysis, documentation and testing tools, application generators and screen painters, CASE, database design and modeling tools, data conversion and transfer applications, DBA and systems administration tools, disk/file utilities, engine/file management subsystems, graphics applications, help systems, class libraries, printing and publishing tools, query tools, report writers and a variety of utilities. The guide includes vendor information and a brief description of each product. The listings were developed through a reader survey requesting detailed product descriptions, platform information and prices. Some prices are not provided because they vary according to operating systems used, hardware platforms, upgrade considerations, site licensing agreements and promotional discounts.

ABSTRACT: A buyer's guide of 127 data **communications** , connectivity and networking packages is presented. Provided information includes company name, phone number, product name, price and brief product description. Examples include Simware Inc's \$249 A2B for Windows 3.0 emulation **software** , which gives users complete control of remote host connections via seven custom controls. Asante Technologies Inc's Asante View for Windows 2.4 includes both out-of-band and in-band network management capabilities from both Apple Macintosh and Windows-based PCs. The package is able to track 16 performance statistics and also supports user-defined alarm thresholds. Pricing ranges from \$399 to \$1,299. Pinnacle Publishing Inc's \$299

CommTools for FoxPro 2 provides a **communications** library that enables FoxPro programmers to add serial **communications**, telecommunications, modem and fax capabilities.

ABSTRACT: Numerous new products and services for the Apple Macintosh were introduced at the 1993 MacWorld Exposition trade show in San Francisco. Apple announced EWorld, a new online service with a highly graphical interface employing an 'electronic neighborhood' metaphor. The company hopes to attract many desktop publishers to the new service and will offer an 'EWorld Press' for creating electronic documents that preserve the look of print documents. It is now calling its upcoming PowerPC-based Macs 'PowerMacs' to avoid confusion with IBM-compatible microcomputers. Many vendors ported products from the Mac to Windows and vice versa. New products announced included Fractal Design Corp's Painter 2.0 and Dabbler paint **software**, MacEurope Information Systems' Imagician graphics accelerator board and LogoCorrector, a drawing package from Swedish developer Illom Development that is optimized for text rotation, alignment and parallel creation.

DOCUMENT TYPE: Column ISSN: 0001-0782 LANGUAGE: ENGLISH
RECORD TYPE: FULLTEXT; ABSTRACT
WORD COUNT: 4458 LINE COUNT: 00368

ABSTRACT: The National Information Infrastructure (NII) is receiving the attention of the Clinton administration, and the Internet community and interactive TV community have been working on the information infrastructure. The Internet is becoming larger, more commercial, and more global; new ways of accessing the network are being developed. The transition from subsidized experiment to commercial service requires changes in government policy. The cable TV industry has now run cable by 97 percent of US households and connected 61 percent of them; they are converting trunks from coaxial cable to optical fiber to increase capacity, reliability, and picture quality. The outlook for video on demand, shopping via interactive TV, and the role of phone companies in the enhancement of cable TV systems are examined; the Internet and interactive TV communities are compared.

ABSTRACT: Apple Computer Inc has just made existing Macintoshes more powerful by offering a suite of inexpensive system extensions as part of System 7 Pro, the company's new system **software**. Customers purchasing the suite will receive the PowerTalk, AppleScript and QuickDraw GX programs, which will enable them to print via a single icon, pass data throughout applications without letting go of the mouse and send e-mail without leaving the paint program. QuickDraw GX, Apple's new imaging architecture, offers a range of new typographic and graphic capabilities. PowerTalk offers an Apple Open Collaboration Environment (AOCE)-based suite of **software** technologies that standardize all forms of **communications**. AppleScript sits on top of Apple events and automates multistep tasks; it also lets users tell multiple AppleScript applications the jobs they should perform.

WORD COUNT: 6727 LINE COUNT: 00541

ABSTRACT: The videoconferencing market is developing as top vendors adopt

international standards and the systems become more affordable. Hardware integration, switched network accessibility and improved **software** are leading to increased use by companies; over half of the Fortune 1000 companies already have videoconferencing systems and the rest plan to make purchases within three years. Small-group videoconferencing is the fastest growing segment of the market. These self-contained systems provide a wide choice of transmission options and are priced between \$40,000 and \$50,000. New small group and desktop systems priced under \$20,000 recently reached the market, bringing videoconferencing to a new class of users and organizations. Board-level desktop systems are lowering the costs of videoconferencing to around \$5,000, including the microcomputer. Users are generally not impressed with the quality of the pictures generated by current technology.

ABSTRACT: A directory of 1001 hardware and **software** products for the Apple Macintosh microcomputer is presented. Each product has been reviewed by MacUser and each one's overall rating is given. Basic features are also provided as well as each product's price and the manufacturer's address. Products that are award winners are indicated with a *.

Cost of image focused at NOAC. (high cost of image -check processing discussed at the American Bankers Association National Operations and Automation Conference)
Tracey, Brian
Computers in Banking, v7, n7, p10(4)
July, 1990

ISSN: 0742-6496 LANGUAGE: ENGLISH RECORD TYPE: FULLTEXT; ABSTRACT
WORD COUNT: 2859 LINE COUNT: 00237

ABSTRACT: The 1990 American Bankers Association National Operations and Automation Conference (NOAC) promises back-office productivity gains for banks that will invest in expensive **image** check processing equipment. Only limited bank growth is possible without improving technology, but many banks are restructuring and consolidating and are not in a position to make large capital investments. Security Pacific Corp plans to invest \$35 million to \$40 million on an IBM **image** check processing system, while The Northern Trust Co is a beta testing site for a Unisys system. Northern Trust states that despite some problems, the system provided improved **image** quality, and added that the system will pay for itself in 3.2 years.

WORD COUNT: 6880 LINE COUNT: 00571

ABSTRACT: The 1990s is expected to be the decade of computer-integrated manufacturing (CIM). Electronic data interchange (EDI) will be a critical factor in handling the broad computerization of manufacturing. Additionally, competitive pressure will force even small businesses to turn to management information systems to function at top efficiency. Among the technologies that will support CIM are tools to improve data capture, the most error-prone aspect of information processing. Tools for the improvement of data capture include bar code scanners, voice data entry, machine vision and smart cards.

WORD COUNT: 1721 LINE COUNT: 00141

ABSTRACT: Costs of sophisticated telecommunications devices are falling, and suppliers are preparing for the market represented by small-sized and **medium** -sized companies. Manufacturers are moving into broader integration of voice with other telecommunications media. Wang's OFFICE-Voice Mail is typical of new integrated systems, offering text, **image** and voice information on a comprehensive **communications** arrangement. Fax-telephone systems are becoming common. An example is Infostar-Fax 2, introduced early in 1989 by Vodavi Inc. Other examples are: Panasonic's KX-F120, and Ricoh's RF800. Call accounting is widely used. Electronic mail is increasingly affordable. One of the fastest growing areas is cellular technology. Integrated services digital network (ISDN) will be a key to tomorrow's integrated systems. ISDN is already available in proprietary versions from some vendors.

Flat-file databases: Project Database II. (Software Review) (evaluation)
Krasnoff, Barbara
PC Magazine, v5, n13, p187(31)
July, 1986
DOCUMENT TYPE: evaluation ISSN: 0888-8507 LANGUAGE: ENGLISH
RECORD TYPE: FULLTEXT; ABSTRACT
WORD COUNT: 19814 LINE COUNT: 01498

ABSTRACT: There is considerable temptation in the personal computer **software** industry to go with the most complicated alternative in any particular area, believing that it represents the latest in technological innovation and will provide the sophistication and complexity required for future applications growth. Often a much better solution for users' **software** needs is a simpler, perhaps even old-fashioned application package, particularly when the requirements of the user are basic. Flat-file databases accept, reorganize and report on information, and while they may not link files or have programming languages, the capabilities of some of the packages in the category include sophisticated user interfaces, extensive data entry, mathematical and sorting facilities, and sophisticated report-form generation. The 26 flat-file database managersevaluated have been tested using the same methods as were used in the evaluations of the programmable and relational packages in earlier editions, and the capabilities of the packages may be surprising, providing users whose database needs are uncomplicated with plenty of power and functions.

ABSTRACT: Project Data Base Part 7 evaluates nine different data base management systems for the IBM PC. All of these systems can handle two or more files simultaneously and have a procedural language, or other means for performing programming operations against the data base. All of these packages are unique or revolutionary in some way and represent the cream of the database crop.

Thinking Outside the Boxes -- An old-line manufacturing company prospers with an online wireless network that carries important data to key production workers. (Corrugated Supplies) (Company Operations)
Joch, Alan
Network Magazine, p96
June 1, 2001
Language: English Record Type: Fulltext Abstract
Document Type: Magazine/Journal; Trade
Word Count: 3011

ABSTRACT:
Corrugated Supplies needed a way to streamline their systems to make it easier for their employees to deal with orders and for customers to place their orders. The 11 person IT department developed proprietary resource **management software** so that customers can enter their orders over the Internet. Corrugated is building an even bigger warehouse so they also needed a way for their forklift drivers and others to receive information. They enlisted the help of Cisco Systems for a wireless network and will be using their network switches and bridge routers.

ABSTRACT: EDN magazine is holding the seventh yearly competition for Innovator and Innovation in the field of electronics. Winners will be known in the May 8, 1997 issue. A list of candidates is presented. These include Linfinity Microelectronics senior staff engineer Dean Wallace, David Bingham and Charlie Allen of Maxim Integrated Products, and Peter Eichenberger of Viewlogic Systems. Candidate innovations include the S631001 1-Mbit CMOS mask-programmable ROM, ZPSD4XX programmable microcontroller peripherals and system-programmable gate arrays.

Intranets take center stage at Comdex. (Comdex-Fall '97) (Industry Trend or Event)

InternetWeek, n690, p59(8)

Nov 17, 1997

LANGUAGE: English

RECORD TYPE: Fulltext; Abstract

WORD COUNT: 6174 LINE COUNT: 00577

ABSTRACT: A list of companies displaying intranet products and services at the fall '97 Comdex computer show is presented. Each company listing includes the company's name, location, phone number, Web site address, line of business, product or service category, booth number and a description of the product or service being displayed. For instance, ActionTec Electronics will display its easy-to-use, plug-and-play ComNet Fax/Modem 10 BT/2 products and its Ethernet PC Cards. And GWI **Software** /Groupware will show its Help! for the Web Web-based support **software** . Lucent Technologies will show its WaveLAN wireless networking product line. SAS Institute will be showing its SAS/Intranet **software** for developing dynamic Web pages on demand. And Unisys Global Customer Services will be highlighting its project management and consulting services.

ABSTRACT: The implementation of the new IEEE 802.11 wireless data standard
is expected to result in the proliferation of wireless local area networks
that will enhance workers' mobility in and out of the office. This
standard, which is similar to the 802.3 Ethernet standard, uses an 11-chip
spreading code called Barker sequence to provide optimum data security and
eliminate band noise problems while improving **communications** efficiency.

April 3, 1995
ISSN: 1068-6827 LANGUAGE: ENGLISH RECORD TYPE: FULLTEXT; ABSTRACT
WORD COUNT: 5976 LINE COUNT: 00457

ABSTRACT: Digital servers, essentially computer hard drives used to store
video, offer cost savings and flexibility vis-a-vis videotape. The savings
are mostly in three areas: equipment, maintenance and operations. Access is

random, unlike videotape, where access is serial, making servers ideal for commercials. Two obstacles to usage are the complicated software required and a huge, expensive videotape installed base.

ABSTRACT: The 1990s is expected to be the decade of computer-integrated manufacturing (CIM). Electronic data interchange (EDI) will be a critical factor in handling the broad computerization of manufacturing. Additionally, competitive pressure will force even small businesses to turn to management information systems to function at top efficiency. Among the technologies that will support CIM are tools to improve data capture, the most error-prone aspect of information processing. Tools for the improvement of data capture include bar code scanners, voice data entry, machine vision and smart cards.

WORD COUNT: 1721 LINE COUNT: 00141

ABSTRACT: Costs of sophisticated telecommunications devices are falling, and suppliers are preparing for the market represented by small-sized and **medium** -sized companies. Manufacturers are moving into broader integration of voice with other telecommunications media. Wang's OFFICE-Voice Mail is typical of new integrated systems, offering text, **image** and voice information on a comprehensive **communications** arrangement. Fax-telephone systems are becoming common. An example is Infostar-Fax 2, introduced early in 1989 by Vodavi Inc. Other examples are: Panasonic's KX-F120, and Ricoh's RF800. Call accounting is widely used. Electronic mail is increasingly affordable. One of the fastest growing areas is cellular technology. Integrated services digital network (ISDN) will be a key to tomorrows integrated systems. ISDN is already available in proprietary versions from some vendors.

ABSTRACT: A contemporary version of the existential credo "I think,therefore I am" must be "I run spell check, therefore I write." For, all too often, passing a spell check is the best that can be said of some technical writing. With technology after technology being piled on us in our daily IT existence, information overload is so much a fact of life that it is rarely mentioned. Yet, it is only "words" that let us deal with this glut. Good writing, then, is a necessity, not a luxury.

WASHINGTON--(BUSINESS WIRE)--Nov. 2, 1999--MMC Networks (Nasdaq:MMCN),
the leading supplier of Network Processors, today announced its Alliances
Program, which will lower network equipment vendors' development risks and
speed their time-to-market.

MMC's Alliances Program consists of partnerships with product
companies supplying complementary hardware and software, and services
companies offering assistance to network equipment vendors to simplify
their development and streamline their production.

New Colour LCD TV Automatically Optimizes Screen Brightness

M2 Presswire, pN/A

Nov 14, 1994

Language: English Record Type: Fulltext

Document Type: Newswire; Trade

Word Count: 1190

TEXT:

14 November 1994-New Colour LCD TV Automatically Optimizes Screen Brightness Sharp Introduces New 5.6-inch Colour LCD TV and Car-Mount TV Kit Vehicle -Mounted TV Switches to Car-Navigating Monitor at One Touch RDATE: 031094

Sharp Corporation, a major comprehensive electronics manufacture (r, announces the introduction of two new models of colour LCD televisions into the Japanese market. Sharp will soon release the new 6E-Al 5.6-inch Colour LCD TV and its vehicle-mounted version, the 6E-AK1 Tetra-Polar Signal Input Car-Mount Diversity Kit. These new models feature a Light Control Function that automatically adjusts the screen brightness according to the ambient illumination, while Sharp's original High-Brightness, Low-Reflection TFT LCD Panels make it easy to view even in brightly lit rooms and vehicle interiors. It all adds up to more viewer enjoyment with crisp, clear pictures anywhere, at home or on the go.

The 6E-Al 5.6-inch Colour LCD TV offers these outstanding features:

1. The 6E-Al incorporates an Auto Light Control Function to control the screen brightness automatically according to the ambient illumination. By using a photosensor it automatically adjusts the screen to an optimal degree of brightness, making the pictures easy on the eyes.

2. The 6E-Al can be switched instantly to an audio-visual input monitor with one-touch operation via a wireless remote controller. This allows the TV to be hooked up easily to car navigation systems available on the market, making for more versatile use.

The 6E-AK1 Diversity Vehicle-Mount System Kit includes the following peripheral equipment in addition to the above features:

1. The Car Antenna with Built-in Tetra-Polar Signal Input Diversity System can easily fit into a car interior and receive transmissions from all directions, thereby ensuring stable reproduction of images.

2. The Free-Set In-Vehicle Stand allows the LCD television to be easily installed on the car dashboard and adjusted to an optimal position for viewing.

The increasing market for car navigation systems is stimulating demand for LCD TVs. The 6E-AK1's substantially enhanced ease of use is expected to make it a popular item in the car accessories market. The 6E-Al itself offers a wide range of uses, such as viewing in bed, in the kitchen, or anywhere for that matter.

Outstanding Features of the 6E-Al Colour LCD Television:

1. High-Brightness/Low-Reflectivity TFT LCD Panel for excellent viewability even in brightly lit vehicle interiors. * A TFT (thin-film transistor) active-matrix LCD with a normal black and white matrix screen delivers crisp, clear pictures with high contrast (greater than 60:1 measured at best point). * High picture quality with 1 1 3,724 pixels (234 vertical x 486 horizontal) * Low-Reflectivity LCD Panel reduces reflection caused by external light. * High-Transparency LCD Panel and High-Brightness, Long Service Life Backlight provides a maximum screen brightness of approximately 225 cd/m2 , allowing users to enjoy crisp, clear pictures, without the need for a blinding hood, even in vehicles in bright daylight. * It can also be used as a monitor for GPS car navigation systems*1. (*1) Can be connected only to the type that interfaces via video

signals.

2. An Auto Light Control Function allows users to enjoy pictures with an optimal screen brightness that's easy on the eyes. * A built-in sensor automatically detects ambient illumination to adjust the screen to an optimal degree of brightness, making the pictures easy on the eyes.

3. Easy-to-Operate Wireless Remote Control * A Direct Channel Selection System puts one-touch channel selection at your fingertips. * A thin card-type remote controller allows users to command all basic operations, and includes functions like One-Touch All-Channel Memory, **Input Switchover** and others.

4. High-Sensitivity Design broadens potential viewing area. * A built-in PLL -Synthesized Tuner*2 for outdoor use ensures stable video and audio reception. (*2) PLL: Phase Locked Loop

5. One-Touch All-Channel Memory provides quick and easy channel selection. * Up to 12 receivable TV stations can be stored with one-touch operation in approximately 5 seconds. Even when you are travelling or driving in different broadcast areas, local broadcast frequencies can be searched automatically, allowing for quick and trouble-free selection of your desired programs. * When channel selection is completed, the numbers of all stored channels will be displayed on the screen. A distinction is also made between station with strong signals and those with weak signals.

6. Other Features: * Long 7,000-hour Service Life Backlight. * Built-in FM Transmitter (monaural audio) for enjoying TV sound with car-mounted audio equipment. * 4-Way Power Supply (rechargeable battery, home-use AC power source, car battery, dry-cell battery) means you can enjoy these models anywhere. * Audio-Visual (AV) Input Terminal (monaural audio) allows the TV to be hooked up to a VCR or car navigation system. * Heatproof Design stands up to temperatures between -20Deg C and 80Deg C for use in the severest of environmental conditions.

In addition to the above, the 6E-AK1 Diversity Car-Mount LCD TV Kit offers the following three special features,:

The 6E-AK1 utilizes a newly developed car antenna with a built-in tetra-polar signal input Diversity System which can be easily installed in the car interior.

1. Car Antenna with a built-in tetra-polar signal input Diversity System ensures stable TV reception while driving. Automatically selects the best -fidelity wave signals instantaneously from four different system antennas to provide highly stable reception, thereby delivering crisp, clear pictures.

2. Free-Set In-Vehicle Stand Used to install the colour LCD TV on the dashboard or in the glove compartment. The stand comes with a height adjuster for setting the unit in an optimal viewing position.

3. Car Battery Adapter included.

Specifications of the 6E-A1 LCD Monitor Screen size 5.6 inches (84.7(V)x112.8(H) mm) Display system Transmissive TN LCD panel Drive system TFT (thin-film transistor)

active-matrix Number of pixels 113,724 (234(V)x486(H)) Receiving channels VHF channels 1-12 UHF channels

13-62 Audio output 200 mW Speaker 28 mm-dia. round speaker Light source Internal light (built-in

fluorescent tube) Input/output jacks DC input jack (DC 12 V), external antenna jack, earphone output jack, audio/video input jack,

Diversity System jack Power source AC 100V, 50/60 Hz (with AC adapter) DC 9.6V (with optional

rechargeable battery pack, sold separately) DC 12V (with AAA

dry-cell battery) DC 12-24V (with optional car battery adapter,

sold separately) Power consumption approx. 12.0W (AC) - with AC adapter approx. 6.8W (DC) - with

DC 9.6V rechargeable battery approx. 8.0W (DC) - with DC12V

AAA dry-cell battery Outside dimensions 176(W) x 138(H) x 60(D)mm Net

weight approx. 640g Accessories included 1 AC adap 1 wireless remote
controller, 1 instruction manual
with a warranty card

*6E-A1: AC adaptor is optional AN-63AD:List Price Y2,500 (not
including consumption tax)

Product Name	5.6-inch Colour LCD TV	Car-Mount TV
Kit Model	6E-A1	6E-AK1
Nickname	TFT Crystaltron	
List Price	Y88,000	Y118,000 (not including consumption tax)
Release Date	October 24, 1994	
Monthly production System components	5,000 units	5,000 units
	5.6in. color LCD TV	5.6-in. color LCD TV
	Wireless remote control	Wireless remote control
	AC adapter	Car antenna with built-in tetra-polar signal input Diversity System Free-set in-vehicle stand Car battery adapter

FESTech Injection Profiler Software Rev. 2.0 Announced

PR NEWSWIRE

October 06, 1999

JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 316

New Revision Expands Functionality, Improves Technical Aspects

CHICAGO, Oct. 6 /PRNewswire/ -- FESTech Software Solutions, exhibiting at the Modern Mold & Tooling Exposition & Conference in Chicago, today announced the release of Injection Profiler revision 2.0. Injection Profiler software helps improve consistency and quality, while reducing waste, by monitoring injection molding process variables, allowing operators to more closely control the injection cycle. The ability to compare current process temperatures, hydraulic pressure, cavity pressure, or screw velocity parameters against historical data also makes it possible to quickly identify problems and return the process to an optimum state.

Unlike proprietary, hardware-based monitoring and profiling systems, Injection Profiler's open architecture monitors user-selected variables through PLCs, allowing the user much more flexibility than with hardwired systems, even where OEM control units provide injection machine control.

Revision 2.0 provides expanded functionality, including the ability to monitor up to 15 process variables (display any ten), averaging of traces

for profiling, **Hotchover** input , high/low profile marking, and a graphic screen maximize function. The new version also includes the ability to vary data collection rates at different times of the cycle, providing more efficient use of computer drive space.

"The upgrades to Injection Profiler are the result of input from existing and potential customers using cutting edge injection molding techniques," said Steve Ludwig, FESTech's Marketing Director.

Injection Profiler has been featured in A-B Journal (June '99) for its use at Delphi Automotive.

FESTech Software Solutions is a provider of industrial software products, training, applications development, and distributor services. FESTech Software Solutions is headquartered in Findlay, OH, with additional offices in Cleveland, OH and Milwaukee, WI.

FESTech Software Solutions is a Software Technology Center(TM), a Rockwell Software Strategic Provider, and a Microsoft Solutions Provider.

For more information, please see our web site at www.festech.com or e-mail us at info@festech.com .
